Volume 121 August 1982

CONTENTS

Boundary mixing in a stratified fluid. G. N. Ivey and G. M. Corcos *page* 1

The viscous spreading of plane and axisymmetric gravity currents. W. Didden and T. Maxworthy 27

The propagation of two-dimensional and axisymmetric viscous gravity currents over a rigid horizontal surface. Herbert E. Huppert 43

Low-frequency sound radiation and generation due to the interaction of unsteady flow with a jet pipe. A. M. Cargill 59

A dynamic runaway effect associated with flux expulsion in magnetohydrodynamic channel flow. H. Kamkar and H. K. Moffatt 107

Reynolds-number dependence of the structure of a turbulent boundary layer. R. A. Antonia, S. Rajagopalan, C. S. Subramanian and A. J. Chambers 123

The premixed flame in uniform straining flow. P. A. Durbin 141

Steady thermocapillary flows in two-dimensional slots. Asok K. Sen and Stephen H. Davis 163

The instability of sheared liquid layers. Marc K. Smith and Stephen H. Davis 187

Mutations of steady cellular flows in the Taylor experiment. T. Mullin 207

Notes on the multiplicity of flows in the Taylor experiment. T. Brooke Benjamin and T. Mullin 219

An extended channel model for the prediction of motion in elongated homogeneous lakes. Part 1. Theoretical introduction. Gabriel Raggio and Kolumban Hutter 231

An extended channel model for the prediction of motion in elongated homogeneous lakes. Part 2. First-order model applied to ideal geometry: rectangular basins with flat bottom. Gabriel Raggio and Kolumban Hutter 257

An extended channel model for the prediction of motion in elongated homogeneous lakes. Part 3. Free oscillations in natural basins. Gabriel Raggio and Kolumban Hutter 283

Transitions in time-dependent thermal convection in fluid-saturated porous media. G. Schubert and J. M. Straus 301

On the development of fluid trapping beneath deformable fluid-cell membranes. Randall Wu and Sheldon Weinbaum 315

Matched-asymptotic analysis of low-Reynolds-number flow past two equal circular cylinders. AKIRA UMEMURA 345

Estimates of the errors incurred in various asymptotic representations of wave packets. M. GASTER 365

Rapid evaporation at the superheat limit. J. E. SHEPHERD and B. STURTEVANT 379

Parametric solutions for breaking waves. M. S. LONGUET-HIGGINS 403

The spreading of a drop by capillary action. L. M. HOCKING and A. D. RIVERS 425

The wave forces acting on a floating hemisphere undergoing forced periodic oscillations. A. HULME 443

Nonlinear waves near a cut-off frequency in an acoustic duct – a numerical study. J. A. ARANHA, D. K. P. YUE and C. C. MEI 465

A flow-visualization study of transition in plane Poiseuille flow. DALE R. CARLSON, SHEILA E. WIDNALL and MARTIN F. PEETERS 487

The unsteady boundary layer on a rotating disk in a counter-rotating fluid. Part 2. K. STEWARTSON, C. J. SIMPSON and R. J. BODONYI 507

Cambered valve leaflets that maximize initial rate of closure. E. O. TUCK, A. HELFGOTT and R. W. YEUNG 517

REVIEWS

Turbulent Reacting Flows, edited by P. A. Libby and F. A. Williams 530

Engineering Calculation Methods for Turbulent Flow, by P. Bradshaw, T. Cebeci and J. H. Whitelaw 531

CORRIGENDA 533
